BDM/2026-27/2

Dated 06.04.2026

To,

**Shri Narendra Damodardas Modi ji,
Honorable Prime Minister of India,
Seva Tirth, Raisina Hills, New Delhi, 110011.**

Subject: Mandatory Use of BSNL Swadeshi 4G Services to Promote Aatmanirbhar Bharat in Telecom Technology by all the Central Government organizations, State Government organizations, CPSUs, State PSUs and all the employees of such organisation claiming reimbursement from Public Funds- Regarding.

Respected Sir,

First of all, on behalf of the employees of BSNL, we extend our heartfelt thanks and gratitude for the endeavors taken by the government to revive BSNL which has brought this ailing company from ICU to a position where it is now breathing healthy and with prosperity.

The Government of India has consistently emphasized the strategic importance of achieving self-reliance in critical sectors, **with telecommunications being one of the most vital pillars of national infrastructure.** In alignment with the vision of **Aatmanirbhar Bharat**, it is imperative to actively promote and adopt indigenous telecom technologies and services that enhance national capability, security, and economic resilience.

Bharat Sanchar Nigam Limited (BSNL), as a Government of India enterprise, **is at the forefront of this mission by deploying Swadeshi 4G technology**, developed with indigenous components. BSNL is not merely a telecom service provider but a strategic national asset that ensures connectivity in remote, rural, and border areas where private operators often have limited presence. **Its role is crucial in bridging the digital divide and supporting governance, security, and socio-economic development. BSNL, being a government-owned telecom service provider, plays a vital role in ensuring secure, reliable, and indigenous communication infrastructure.** Encouraging its adoption will significantly contribute to reducing dependency on foreign telecom technologies and fostering domestic innovation.

In furtherance of the Government of India's vision of **Aatmanirbhar Bharat** and with the objective of strengthening indigenous capabilities in telecom technology, **it is suggested that the adoption of BSNL's Swadeshi 4G services be made mandatory for all mobile connections wherever expenditure is reimbursed from public funds including all central and state government and public sector entities.**

Hence, we humbly submit before your good self to consider our request for making use of Swadeshi 4G mandatory for all the Government Organizations, State Government Departments, Central Public Sector Undertakings (CPSUs), State Public Sector Undertakings (SPSUs), and all employees of Central Government, State Governments, CPSUs, and SPSUs who claim reimbursement of mobile expenditure from government or PSU funds for official mobile communications.

This initiative shall give a huge boost to:

- **Strengthening Aatmanirbhar Bharat in Telecom:**
Adoption of BSNL's indigenous 4G stack directly supports domestic research, development, and manufacturing ecosystems, reducing reliance on foreign telecom vendors and technologies.

- **National Security and Data Sovereignty:**
Utilizing a government-owned telecom network ensures greater control over data flow, enhancing security, privacy, and resilience against external threats.
- **Financial Support to a Strategic Public Sector Enterprise:**
Channeling government-funded telecom expenditure towards BSNL will improve its financial sustainability, enabling further investments in indigenous technology, network expansion, and service quality enhancement.
- **Inclusive Connectivity and Social Responsibility:**
BSNL plays a pivotal role in providing telecom services in underserved and strategic regions. Increased adoption will strengthen its capacity to continue serving these critical areas.
- **Optimized Utilization of Public Funds:**
Ensuring that reimbursement-based mobile expenditures are directed towards a government entity aligns public spending with national development priorities. **This will ensure that public funds are utilized to support Swadeshi Telecom Infrastructure.**
- **Catalyzing Domestic Telecom Ecosystem:**
Wider adoption will create demand for indigenous telecom equipment, software, and services, thereby generating employment and fostering innovation within the country.

This step will definitely be a milestone step towards reinforcing India's telecom sovereignty and realizing the vision of Aatmanirbhar Bharat. Accordingly, we request your kind blessing in considering our suggestions and making the use of BSNL Swadeshi 4G services mandatory for all the official mobile communication.

With Warm Regards,

**Ravi Shil Verma
